General assessment

- The current debt payment ratio as of date 30/09/2025 is 1.01 times > 1, ensuring the Company's solvency. Sufficient ability to pay debts due.
- The short-term debt balance as of 30/09/2025 was 1,156 billion VND, while the current assets balance was 1,166 billion VND, indicating that the Company still maintains its ability to settle short-term obligations when due and to ensure continuous business operations.
- The return on equity (ROE) in 2025 reached 5.70%, lower than 9.03% in 2024. The main reason is that in 2025 the Company increased its equity, causing the ROE denominator to rise significantly while profit after tax has not increased correspondingly.
- As of Date 30/09/2025, the long-term assets/total assets ratio is 41.46%. The permanent resources ratio is 58.07%, which proves that long-term ASSETS are entirely financed by permanent resources.

- The Audit Committee always received active support from the Leadership level and departments during the working process, which created favorable conditions for the inspection and supervision work of the Independent member of the Board of Directors.

- This report is respectfully submitted by the Independent Member of the Board of Directors and the Audit Committee of Hung Hau Agricultural Corporation to the Annual General Meeting of Shareholders 2025.
